

## GlobalFit Launches Gym Check-in Feature to Enhance its FitBucks Rewards Program

PHILADELPHIA, Feb. 24, 2016 /PRNewswire/ -- GlobalFit's FitBucks Rewards™ is part of a total population health solution that is used to reimburse or reward employees and insurance plan members for making healthy choices. Using geo-access technology, the recently released "gym check-in" feature is designed to streamline the process of submitting proof of attendance and provides greater accuracy in validating gym visits, making it easier for users to receive their gym reimbursement.

The structure of FitBucks Rewards gives clients the flexibility to control all aspects of the reimbursement process, including who is eligible, what is reimbursable, how much is available for reimbursement, what proof is required, and what method of payment is used.

"Choosing to reimburse or reward employees or plan members for making healthy choices increases participation in wellness programs and drives key behaviors that lead to better health outcomes and less health plan utilization," **says Richard Penn, CEO.**
